- RabbitMQ, Apache Kafka

API Management & Performance:

- API Gateway, Load Balancing, Rate Limiting and Response Compression

Frontend:

JavaScript, jQuery, Angular

WORK EXPERIENCE

BigShip Technologies Pvt. Ltd, Noida

Role Software Developer

Duration March 03,2024 – Present

Project: Tracking Management System, NDR & Alert Notification Modules.

Responsibilities

- Developed real-time shipment tracking module from scratch for multi-courier integration.
- Designed and implemented NDR (Non-Delivery Report) module to manage the undelivered shipments and reattempt workflows.

- Worked on alert notification system to send the shipment status updates.
- Built RESTful APIs using ASP.NET Core Web API with SQL Server for data persistence.
- Applied Onion Architecture principles for better separation of concerns.

Planet E-Com Solution Pvt. Ltd. New Delhi

Role Software Developer

Duration July 26,2022 – October 09, 2023

Project-1: Data Management System (CRUD & Bulk Operations)

Responsibilities

- Developed UI-based module to store client provided data into database tables with data visualization chart and graph.
- Implemented full CRUD operation (Create, Read, Update, Delete).
- Designed bulk insert, bulk update, and bulk delete functionality for large datasets.
- Applied Clean Architecture principles for better separation of concerns.
- Built RESTful APIs using ASP.NET Core Web API and developed UI using ASP.NET Core MVC in .NET 6 and SQL Server for data persistence

Project-2: Helicopter Landing Permission Management System

Responsibilities

- Developed an online system for air operator to submit helicopter landing permission requests.
- Implemented approval and rejection work flow for district authorities.
- Implemented role-based access for admin user, district authorities and air operators.
- Developed the application using ASP.NET MVC with PostgreSQL for data persistence
- Designed and implemented separate RESTful Web API to support mobile application.

Chetu India Pvt. Ltd. Noida

Role Software Engineer

Duration (January 07,2022 - June 30,2022)

Project : CRM based project

Responsibilities

- Analyze existing codebase and implement minor enhancement as per requirement.
- Collaborated with team members to troubleshoot and resolve the functional issues.
