

ARCHANA NERKAR

9420303347 | archananerkar193@gmail.com | Nasik, Maharashtra

PROFESSIONAL SUMMARY

Backend-focused software developer with hands-on experience building and maintaining web applications across the full request lifecycle — routing, controllers, business logic, and data access — and currently deepening cross-platform, dependency-injection-driven development with ASP.NET Core, using C#, ASP.NET MVC 5, and Entity Framework, backed by a MSSQL Server data layer.

TECHNICAL SKILLS

Languages	C#, JavaScript, HTML5, CSS3
.NET Ecosystem	ASP.NET MVC 5.2, ASP.NET Core (Web API & MVC, .NET 8), Entity Framework, Clean Architecture
Data Access	LINQ, Entity Framework
Databases	SQL Server, MySQL (MySQL Workbench)
Front-End / Scripting	jQuery, AJAX, JavaScript, HTML, CSS
Integrations	RESTful APIs, data visualization (charts & graphs)
Tools & Platforms	Visual Studio 2022, Git, SmarterASP.NET (deployment/hosting)
Other	Unity 3D (C# scripting, UI/UX for applications & mobile game components)
Practices	Requirement analysis, prototyping, implementation & configuration, testing within schedule, client support & issue resolution
Languages Spoken	English, Hindi, Marathi

EXPERIENCE

Software Developer — PECS, Delhi

May 2022 – March 2023

- Developed and maintained web applications using **ASP.NET Core, C#, SQL Server, LINQ, Entity Framework, REST APIs, and jQuery/AJAX**.
- Worked on multiple projects including **IIPM, Hostel Reservation & Trainee Assessment System, and Kerala Tea Migration**.
- Developed **hostel reservation functionality** for trainee and guest bookings, including real-time room availability and occupancy status.
- Built **session-wise quizzes, timed assessments, post-program tests, and reports** based on business requirements.
- Developed the **Kerala Tea Migration** system with CRUD, bulk data operations, RESTful APIs, SQL Server, and data visualization.
- Integrated **SAP APIs** using JSON-based request and response payloads.
- Participated in development, testing, debugging, and production support.

Junior MVC Developer — SoftClick IT Solutions, Nashik

Jan 2021 – Dec 2021

- Built and maintained a Hotel Reservation Booking System (Umrah Central Booking System) on ASP.NET MVC 5.2 with Entity Framework as the ORM layer — the same layered architecture (controllers, services, data access) carried forward in ASP.NET Core applications.
- Designed and implemented the project database in MySQL Workbench; wrote LINQ and Entity Framework queries for CRUD operations and business rules.
- Used jQuery and AJAX to build responsive, asynchronous UI interactions without full page reloads.
- Deployed and supported the application on SmarterASP.NET hosting, handling configuration across environments.
- Partnered directly with the client to translate requirements into working prototypes and resolved production issues through ongoing support.

Trainee Engineer — Unity Developer — Z-Dimension, Pune

Oct 2018 – Oct 2019

- Contributed to development, support, and integration for the INCS (Indian Navy Canteen System) — a 3D virtual shopping application built on the Unity engine.
- Programmed UI, menus, and core functionality using C# and JavaScript; built and iterated on prototypes against changing requirements.
- Implemented order-detail workflows for customers and owned end-to-end feature configuration, testing, and debugging.
- Worked cross-functionally with the support team and client to triage and resolve issues within project timelines.
- Integrated the payroll module with Leave & Attendance and Employee Self-Service (ESS) systems to track employee working hours.
- Programmed payroll logic to calculate earnings, deductions, taxes, and final payouts based on organization, department, and employee-level structures.
- Implemented automated workflows for generating, viewing, and printing monthly pay slips.
- Integrated RFID devices and tags to capture In/Out movement logs and track transitions between locations.
- Calculate the total duration spent by employees across different campus areas.

PROJECTS

IIPM (Indian Oil Training Management System) — PECS, Delhi

May 2022 – March 2023

- Built a **hostel reservation module** supporting trainee and guest bookings with real-time room availability and occupancy status.
- Developed a **session-wise quiz module** with MCQs and configurable timed assessments.
- Implemented **post-program tests** with configurable durations and trainee assignments.
- Generated reports based on stakeholder requirements.
- Integrated **SAP APIs** for consuming and producing **JSON-based payloads**

Kerala Tea Migration -Data Management System – PECS, Delhi

- Implemented full CRUD operations (Create, Read, Update, Delete).
- Designed bulk insert, bulk update, and bulk delete functionality for large datasets.
- Applied Clean Architecture principles for better separation of concerns.
- Built RESTful APIs using ASP.NET Core Web API and developed the UI using ASP.NET Core MVC on .NET 6, with SQL Server for data persistence.
- Developed a UI-based module to store client-provided data into database tables with data visualization via charts and graphs (XML).

Umrah Central Booking System (UCBS) — SoftClick IT Solutions, Nashik

Jan 2021 -Dec2021

- Hotel reservation booking platform built on ASP.NET MVC 5.2 with Entity Framework; database designed and managed in MySQL Workbench.
- Owned feature development end-to-end: writing and implementing code, identifying gaps in the existing system, and extending functionality per new requirements.
- Maintained the live application on SmarterASP.NET, an architecture pattern directly reusable when migrating to ASP.NET Core hosting.

INCS — Indian Navy Canteen System — Z-Dimension, Pune

Oct 2018 – Oct 2019

- 3D virtual online shopping mobile application built on the Unity engine.
- Programmed and executed UI, menus, and core functionality; implemented order-detail handling for customers.
- Installed, tested, and debugged software components across the application lifecycle.

Employee Workforce Management System — Z-Dimension, Pune

Modules:

Payroll Management

- Integrated with Leave & Attendance and Employee Self-Service.
- Tracks working hours.
- Calculates salary, earnings, deductions, taxes, and final payroll.
- Supports salary structures at organization, department, and employee levels.
- Generates/prints pay slips. Employees can download or print it directly via the portal, and HR can batch-print them if needed.

Movement Tracking

- Uses RFID devices/tags to track employee movement.
- Records In/Out movements.
- Tracks movement between locations.
- Calculates the duration spent in different campus areas.

EDUCATION

B.E., Computer Engineering — R.C.P.I.T., Shirpur

Apr 2012 – Jun 2016

First Class, 60.3%

H.S.C. — Nashik Board, Shahada

Jun 2011 – Apr 2012

First Class, 70.6%

S.S.C. — Nashik Board, Shahada

Jun 2009 – Apr 2010

Distinction, 77.5%

CERTIFICATIONS

- Java Certification — Java by Kiran, Pune (2018)
- C Programming Certification — Prasad Computers, Shahada (2014)

EXTRACURRICULAR ACTIVITIES

- Participant, 'Blind-C' National Level Event — Jalgaon, MH (Sep 2014)
- Volunteer, Tree Plantation Drive — Shirpur, MH (Mar 2015)
